FOR THE MONITORING OF CRYSTAL  
LAGOONS

## PHOTOGRAPHIC PROCEDURE FOR MONITORING A CRYSTAL LAGOON

The purpose of this procedure is to present the required photographic specifications for the pictures taken to the Lagoon, on a daily basis, as a complementary control process to the operational monitoring performed by Crystal Operations Team through the telemetry system and site visits.

Every day, at noon time, 5 to 7 pictures showing different angles of the Lagoon, should be captured and submitted to Crystal Lagoons Operations Department.

Such requirements are described below:

- 1 or 2 pictures showing a macro view of the Lagoon, preferably taken from a high level area, in order to have a general idea of the overall condition of the Lagoon.

Example:

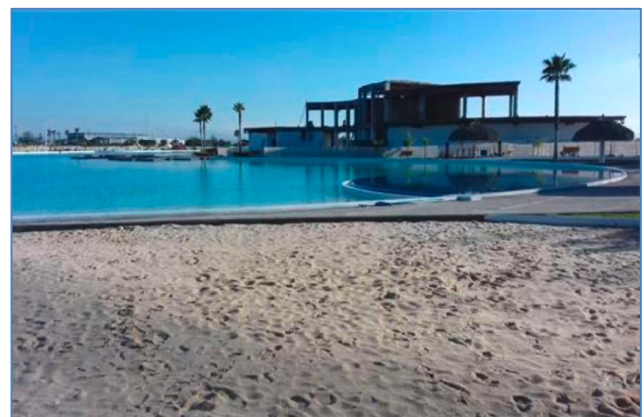

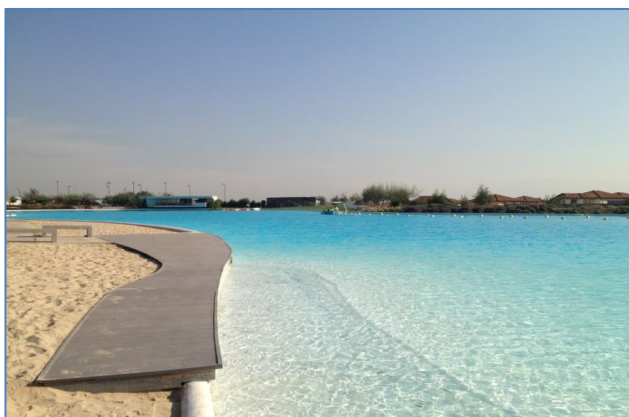

- 1 picture showing water level. The easy way is to photograph a skimmer in the Lagoon for a quick reference of the water level.

Example:

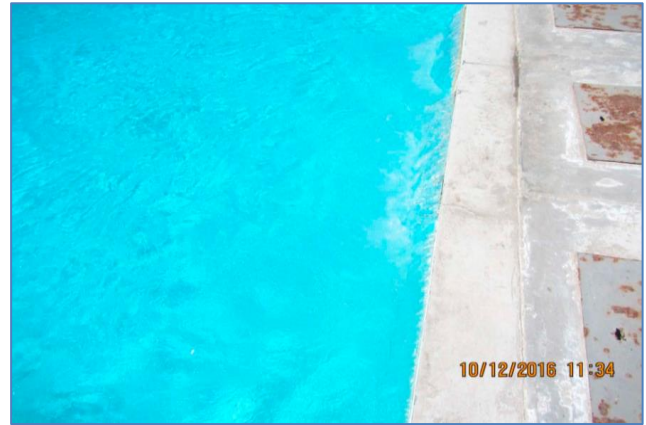

- 1 or 2 pictures showing beach areas.

Example

- 1 or 2 pictures from a short distance, showing water texture and Lagoon bottom details.

Example

Photos should be submitted to:

1. [Operaciones@crystal-lagoons.com](mailto:Operaciones@crystal-lagoons.com)
2. Crystal Lagoons Lagoon Supervisor

Important: Photos should be issued in .jpg format
